

Study shows senior dogs had improved cognitive function with DHAgold!

The omega-3 fatty acid DHA is an essential nutrient for brain and eye development. A 2013 study showed that a group of 8 to 10 year old dogs fed food containing DHA-gold for 6 months had significantly improved memory and visual performance compared to the control group.

DHAgold is an all natural, high quality, sustainable ingredient. Foods, treats, and supplements with DHAgold provide your pet with a SMART source of DHA .

Ingredients that help protect the environment and our natural food resources proven attractive to pet parents!

In a MarketTool survey, nearly 90% of U.S. pet parents presented with DHAgold pet product concepts from DSM agreed with the statement “Protecting the environment and our natural food sources is important to me.”

DHAgold dried golden algae is an all natural, high quality, sustainable source of Omega-3 DHA. Consider developing your next pet product with DHAgold instead of fish by-products.
