

EXPERIENCE SPEAKS VOLUMES

For more than six decades, we have been controlling animal nutrition facilities to meet the demands and standards of an ever-changing industry.

At WEM Automation, we understand the importance placed on consistent quality and safety by pet owners when choosing a brand of pet food. We know it drives you as well.

Rely on WEM's experience to create a control systems to ensure the process of pet food manufacturing is under control - and always in compliance with industry standards.

EXACTING SOLUTIONS

Experience gives us the tools to understand the demands of the industry. Innovation enables us to meet these demands by using the newest advancements in technology.

The WEM process design advantage begins with an in-depth understanding of the automation need - from the entire "end to end" process to each individual component.

By immersing ourselves in the details, WEM solutions account for every detail needed today... and are best prepared to meet the standards of tomorrow.

Whether its expanding or optimizing an existing operation to building a new greenfield facility, WEM is prepared to embrace the challenge and apply our years of industry experience. You can trust that WEM has the ability to tailor a solution that will best meet your safety, quality, reliability, and efficiency needs. We have a track record of success.

IN DOG YEARS, WEM HAS DESIGNED, BUILT AND SUCCESSFULLY IMPLEMENTED AUTOMATION SOLUTIONS FOR NEARLY 450 YEARS.

INNOVATIVE TRADITION

WEM understands the uniqueness of the pet food production process and critical process needs such as extruders and dryers. Our knowledge is as profound as our commitment to innovation.

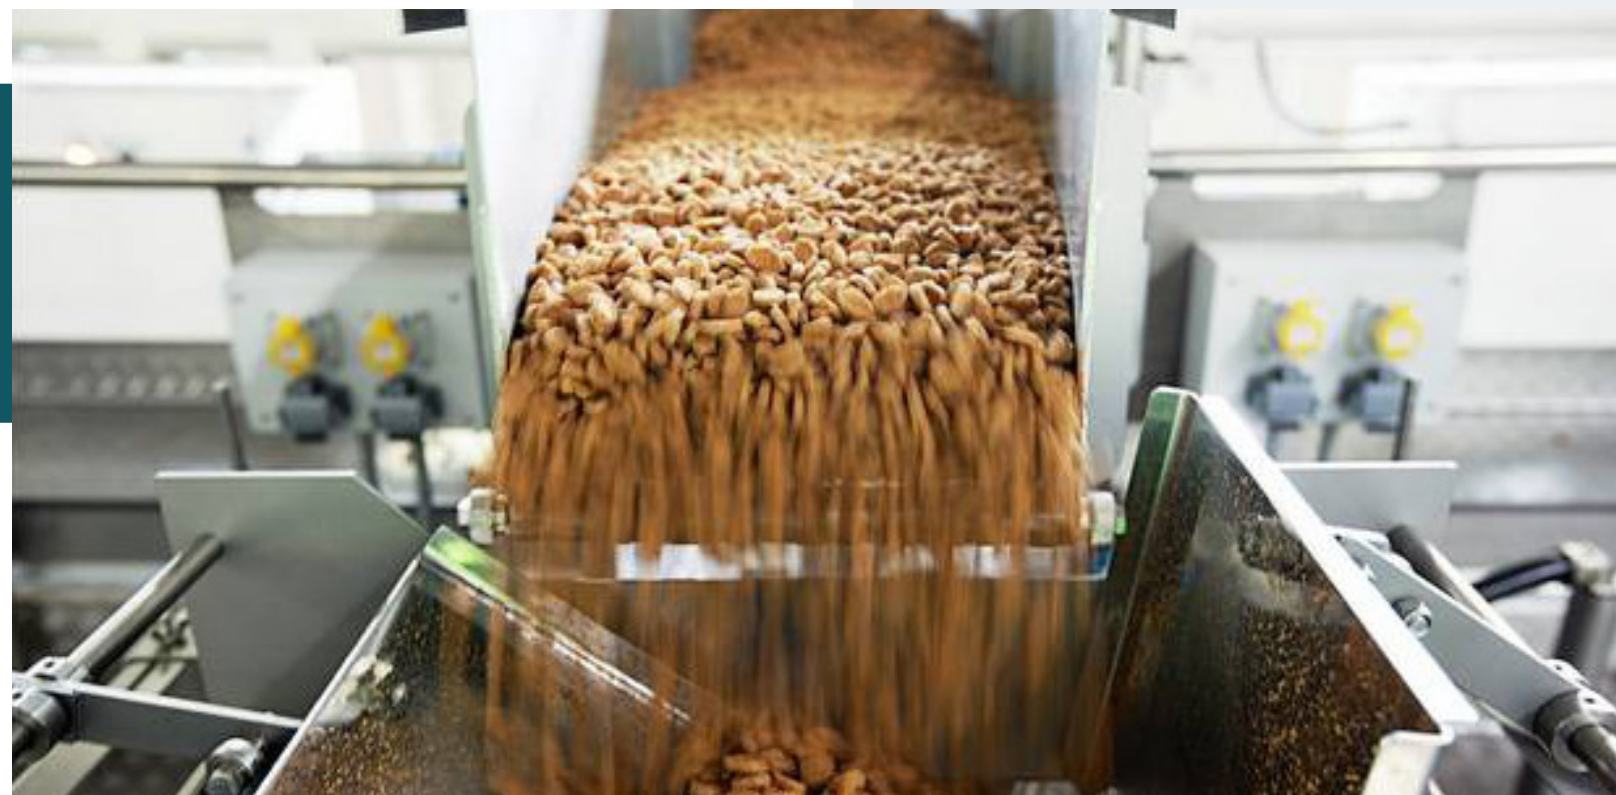

Since our onset, WEM has made finding and using the latest and best technology an integral part of our business. It's one of the ways we work to secure success for our customers.

Whether it's creating a single process control or a system for an entire plant, our commitment to innovation combined with industry experience makes the WEM difference.

WEM AUTOMATION SYSTEM CAPABILITIES

- Rail and truck receiving to raw material transfer and storage
- Liquids and solids
- A batching system well suited to dozens, hundreds, or even thousands of ingredients and formulations
- Organic and medicated interlocking to ensure quality
- Built in KPI, SPC data collection and reporting software is available

WEM has the engineering capability and industry knowledge to design and build a system that interfaces with a preferred equipment supplier or controls the entire process.

WHERE TECHNOLOGY MEETS DATA CONTROL

Unlike many automation houses, WEM is equally good at controlling data as we are in creating the automation systems. In fact, we live for the challenge of processes that require big data controls.

WEM data processes use proven PLC controls for automation control, and PC-based software with a SQL database backbone to keep track of all your production records.

Data retention systems are configured by WEM to meet all industry and internal requirements. Software is built to your exacting needs including:

- Creating and managing recipes,
- Configuring batch sequences
- Collecting detailed batch and production data; and
- Monitoring ingredient use and inventory.

WEM Automation has a number of existing ERP interfaces that may meet your needs. If a unique solution is desired, WEM software engineers will write custom interfaces.

WEM's automation systems intuitive, user friendly graphical interface for controlling your facility. Intelligent lot code tracking is used to assure quality and provides useful tools such as mock recalls for internal audits and process verification.

CUSTOM LOT CODE TRACKING

WEM has the answer to the proliferation of pet food SKU's and the added importance of dependable lot code tracking.

WEM offers FSMA compliant lot code tracking software to ensure traceability of materials from raw material receiving, through the manufacturing process to finished goods.

Solutions by WEM will meet your operation's specific needs from manual lot code tracking to automated processes using barcode technology to enter and control inventory transactions.

The result is fast and accurate data capture that is easy to access - and in real time.

WEM SYSTEMS OFFER INTEGRATED REAL TIME MONITORING TO INSURE MAXIMUM UPTIME.

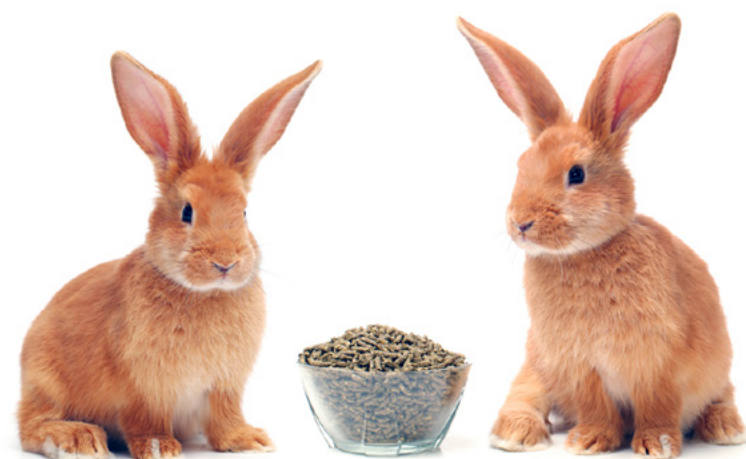

EXPERT INSTALLATION AND SUPERIOR SERVICE

Designed and manufactured in New Berlin, WI (USA) WEM Automation systems are installed and serviced around the globe. WEM System installation and startup services use our own engineers and field service technicians.

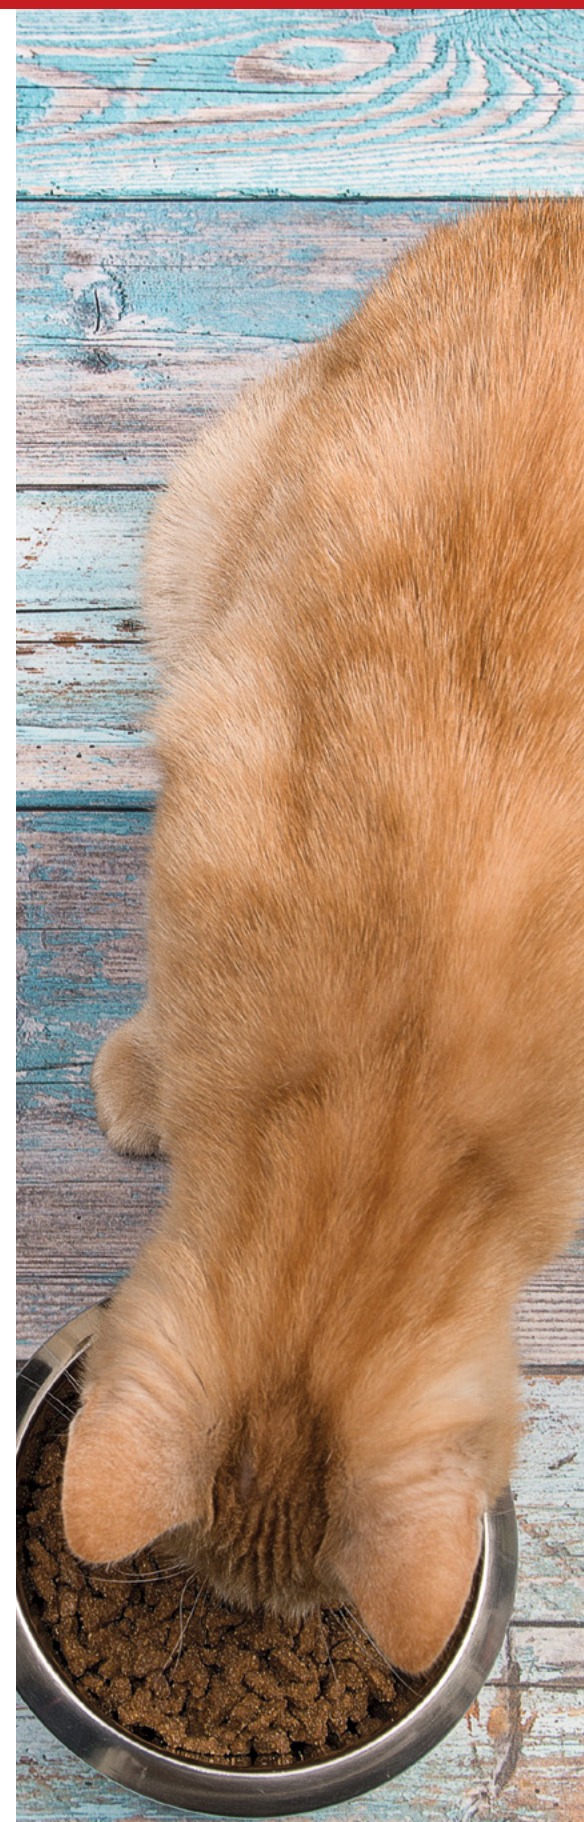

TO MEET THE NEEDS OF PET OWNERS, YOU REQUIRE AN AUTOMATION AND CONTROLS SUPPLIER WHO CAN HELP YOU MEET THE CHALLENGING QUALITY AND PRODUCTION DEMANDS OF THE MARKET, BOTH NOW AND IN THE FUTURE. WEM IS THE PROVEN AUTOMATION

WEM takes pride in our customers' success and satisfaction, that's why we offer 24/7 system support to insure maximum uptime. By utilizing readily available components, our systems are easy to maintain.

After commissioning, WEM offers both remote and on-site support. Telephone and remote support is done by our own staff. 24/7 emergency support is with live operators so you will always talk with a dedicated knowledgeable person.
