

Study proves adding DHAgold to their food supports cognitive function in older dogs!

The omega-3 fatty acid DHA is an essential nutrient for brain and eye development. Based on a study published in 2017, older dogs fed dry food containing 0.4% DHAgold had significantly improved memory and visual performance compared to the control group.

Who needs fish oil when you have a sustainable, natural, free-flowing, dried micro-algae, delivering the healthy benefits of DHA and EPA?
