

WHAT IS ELECTRIC ROOM Rx?

Find Small Problems Before They Become Bigger Problems

Think of it like this: You feel pretty good. You're healthy. But you still get a regular checkup with your doctor because it's good to know about little problems before they turn in to really big problems. It's like that for your electrical system too. Things are working fine today. But will they still be fine tomorrow? You could wait until something happens and address it then. But, that really just puts you at risk for larger hassles down the road.

Use the Process That's Unique to Interstates

Electric Room Rx is a process that is unique to Interstates. It's used to evaluate the condition of your electrical infrastructure and provide recommendation for upgrading or replacing electrical equipment. The process includes diagnostic tools, evaluation of your system, a report of findings and conditions, and recommendation for improvements.

Did You Know?

- | Each year 2,000 workers are admitted to burn centers for injury caused by arc flash.
- | At least 22% of electrical repair costs are extra because they are done unplanned.
- | Average downtime costs in the food processing industry is \$30,000 per hour.

Why Should You Choose Electric Room Rx?

SAFETY

You put your employees at risk for injury, which comes at a cost ranging on a spectrum from minor injury to death.

COMPLIANCE

It's time to ensure your systems meet today's compliance and safety standards for the sake of your employees and the clients who rely on you to meet demand.

RELIABILITY

The last thing you need at your facility is unplanned downtime. How much time can you afford to spend fixing instead of producing? If you are not involved in the day to day activities of the plant, you might not even realize there are small problems.

CAPACITY

Can you see clearly into the future? What if a market opportunity presents itself, but your infrastructure holds you back from making a move? If your system is maxed out, or antiquated, your opportunities to quickly meet changing market demand are lost.

When It Comes to Your Electric Room, It's Not a Matter of If, It's a Matter of When.

Keep your facility healthy with Electric Room Rx. To learn more about Electric Room Rx, contact us at 712.722.1662.
