

## Flexible Stand-up Pouches

### Stand-up pouches – clever & versatile packaging solutions

Pre-made stand-up pouches are becoming increasingly popular for many applications because they offer an attractive combination of properties: perfect protection, convenience, excellent brand presentation and a long shelf life without loss of vitamins or flavour. The flexible concept of our pouches gives customers a wide range of options to choose from, such as customisable shapes and various add-on features. The large display surface serves as an ideal eye-catcher with high-quality printing in up to 10 colours and the use of special inks and varnishes. Both convenience and environmental aspects, such as the avoidance of excess packaging, are high on the agenda nowadays. Compared to metal cans, stand-up pouches made of flexible laminates are less bulky and lighter for shipping, thus offering real cost savings and reducing waste for end-users.

We offer innovative solutions with supreme convenience

features, such as reclosable zippers, tear notches and handles. Single-serve pouches are very handy for consumers who wish to avoid half-empty cans or jars. Another intelligent solution is our anti-staining pouch for products with intense colours. Throughout the retort process, the laminate retains its attractive appearance and prevents grease stains and discolouring – even with white designs.

The versatile stand-up pouches provide excellent advantages for consumers as well as food producers.

#### Benefits for the consumer

- Convenient to handle (e.g. zipper, shapes)
- Easy to carry thanks to lightweight packaging
- Easy opening (e.g. tear notch, laser perforation)
- Preservation of flavour, texture, mineral and vitamins
- Less waste

Our pouches offer reliable protection for your products and clever features for end-consumers.

### Benefits for the food producer

- Optimal product protection and long shelf life thanks to high-barrier laminates
- Suitable for sterile and pasteurised applications
- Low transport and storage volume
- For hot or cold filling
- Eye-catching brand presentation
- Customisable shapes and sizes

Our pouches are available in various material combinations. The main material substrates used are PET, PE, OPP, CPP, OPA, and aluminium and metallised films. Depending on the requirements concerning enhanced barrier properties, materials such as SiOx and EVOH can be added to the laminates. Thanks to the excellent barrier properties of these materials, an extended shelf life of up to one year can be achieved. Pouches are ideal packaging solutions for many industries, including the food, pet food and non-food sectors.

Food & Beverages

Home & Personal Care

Household Industry

Pet Care

### Optional features

Rounded edges

Tear notches with laser perforation

Euro slot

Re-closable zip

Handles

Different shapes and bottom constructions
