

TEMPERATURE CONTROLLED SERVICES

eShipping's Temperature-Controlled Services provide an unbroken cold supply chain whether you're shipping coast-to-coast or globally. Our teams provide customized solutions for all modes complete with packaging options and contingency plans.

PACKAGING FULFILLMENT

Through our partnerships with major active and passive packaging organizations, we provide purchasing and delivery of temperature-controlled packaging units to any location in the U.S.

CONTINGENCY PLANS

Our team has complete handling SOPs, including contingency plans in place, to efficiently manage any delays or disruptions of temperature-controlled goods delivering to U.S. Airlines

PROCUREMENT

Our network of global partners offers us flexibility to find the best services at the best rates, leveraging our volume to secure capacity and competitive rates for both imports and exports

FREIGHT OPTIMIZATION

Our team of specialists use their market expertise to proactively evaluate routing options and optimize shipments in real time.

TRACKING

International Clients receive our Premium Tracking at no additional charge. Clients receive real-time tracking updates in eShipManager® along with proactive communication about possible shipment delays.

TECHNOLOGY

eShipManager® TMS provides a single online platform for managing international freight documentation, accessing real-time tracking information, and gaining vital visibility into trends and spend.

FINANCIAL & RECOVERY SERVICES

We are committed to billing accurately and on-time and provide a variety of easy payment options.

SUPPORTING SERVICES

Services include HTSUS reviews, P.O. Management, cargo insurance, freight claims filing and support, specialized pickup and delivery services, and more
