

Nature Refined

For more than 35 years, Silva International, Inc. has been producing and supplying dehydrated vegetable, herb, and select fruit ingredients to the food industry.

COMMITMENT. FIELD TO FINISH.

Our commitment begins in the growing fields, working hands-on with the farmers. We're tenaciously committed to what we do, staying involved at every step along the way—in some cases, starting even before a single seed is planted.

Our global quality team has intensive training in field monitoring, product processing, and advancement within global food associations and government administrations, all exclusive to the category of ingredients we produce.

This commitment to quality carries through to our extensive processing, storing, shipping, and delivery of the most flavorful dehydrated ingredients.

Every step in our process is designed to deliver what you need most: confidence that your ingredients are the best in the world.

RISK MANAGEMENT

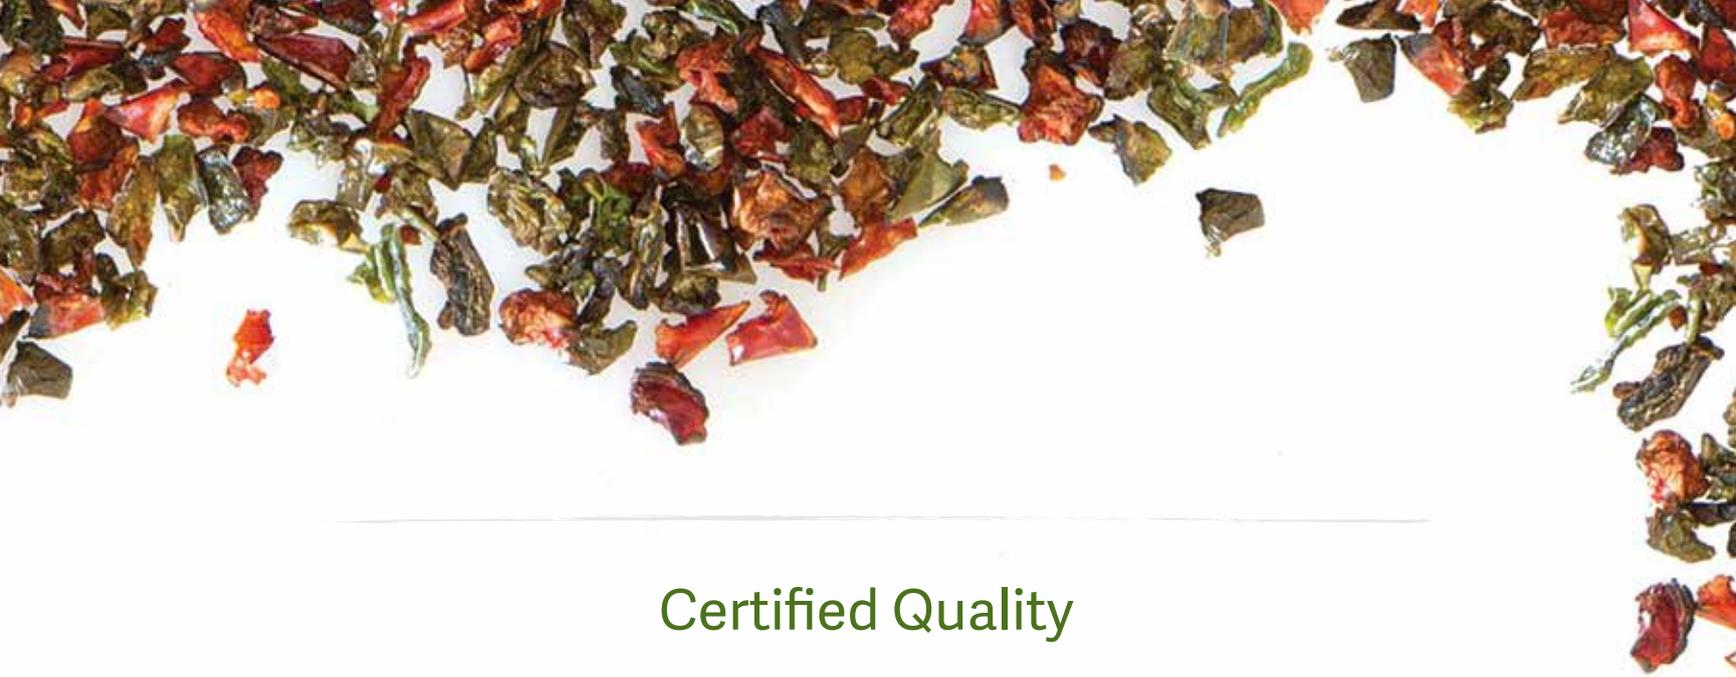

FLEXIBILITY. FINDING THE BEST IN THE WORLD.

We have the flexibility to find the best crop sources in the world. This enables us to provide the best in both cost and quality. We source some ingredients from opposite hemispheres to take advantage of alternate crop cycles and to access the freshest ingredients year-round.

Our strategic partnerships for our raw material give us the ability to combat crop failures and take full advantage of lower costs, while always maintaining the best quality available. We choose the freshest produce from leading planting locations, guaranteeing robust, hearty stocks that result in the most flavorful dehydrated ingredients.

Certified Quality

In adherence to the highest quality standards, all Silva International brand ingredients are certified Kosher and are HACCP, GMP, FDA, USDA compliant. Silva also offers ingredients that have been verified under the Non-GMO Project, along with those certified organic.

SILVA INTERNATIONAL IS PROUD TO BE AFFILIATED WITH THE FOLLOWING ASSOCIATIONS

CONFIDENCE. IN THE PROCESS.

Our advanced processing facility in Momence, Illinois, gives us the kind of flexibility that sets us apart—and quality control that is second to none. Numerous processing lines have been built over the years to continue meeting the growing demands of our customers and the marketplace.
