

WE ARE CLEXTRAL

Twin Screw Extrusion Leaders

With a process of disruption, innovation, and collaboration, we help our customers and partners grow and profit

At Clextral, we're working with our customers, partners and suppliers to tackle everyday challenges and find solutions to the changes affecting markets, technologies, organizations and the planet.

We are designing and manufacturing products using intensified processes and new materials. As we move forward, we are inventing a high-performance, competitive, connected, internationally oriented and flexible factory, integrated into its environment.

We provide our twin screw extrusion expertise, equipment and complete systems to multiple industries that make products to meet the evolving needs and wants of consumers around the world.

“ By building close local ties, we understand regional needs and meld that knowledge with our global expertise to respond with the best solution for each location. ”

FOOD & FEED

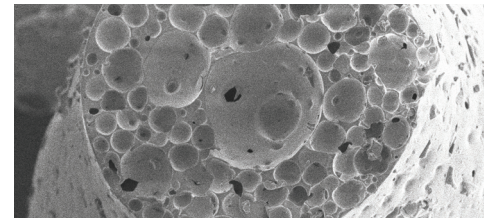

As a world leader in food extrusion, our scope of supply covers a range of products: snacks, breakfast cereals, fibrated proteins, functional ingredients, encapsulated flavors, couscous, pasta, pet food, fish feed, etc.

GREEN INDUSTRIES

Green Extrusion Technology enables efficient continuous processing of many products: cellulose pulp, chemicals and materials from ligno-cellulosic biomass, biodegradable packaging, technical plastics, and energy.

EPT™

Extrusion Porosification Technology is an innovative drying technology that makes powders with improved functionalities for the food, chemical and pharmaceutical industries: coffee, milk protein concentrate, probiotics, and more.

KEY FIGURES

Formed in 1956, the pioneer in twin screw food extrusion since 1970

Turnover > 60 M€
80% export

314 employees

12 worldwide locations

4 R&D centers
