

Construction

DESIGN / BUILD

Tippmann Construction is dedicated to safe and efficient design and construction of multi-temperature processing and distribution facilities for the food industry. In business since 1968, our refrigeration expertise and owner/operator experience make Tippmann Group your single-source provider for all your temperature-controlled construction needs.

- Design/Build Construction of multi-temperature processing & distribution facilities
- Single source provider
- Real estate planning
- Land acquisition
- Local & state economic development negotiations
- Master site planning
- Sustainable designer
- LEED® AP on staff
- Members of U.S. Green Building Council
- 50+ years of experience in the refrigeration industry
- 3,000,000+ square feet of temperature controlled warehouse, distribution and manufacturing space built in the past 3 years
- Automation / Material handling systems integration
- Owner/operator experience & knowledge
- Interstate Warehousing operations staff available to assist construction customers with training & start-up
- Evaluate construction R.O.I. as an owner would, because we are also owners
- Expansions & renovations of existing facilities
- Project management & construction
- Extensive "Safety First" program

Interstate Warehousing

COLD STORAGE & DISTRIBUTION

- 5th largest PRW in United States (data from 2020 IARW/GCCA)
- 115,000,000+ cubic feet of cold storage warehouse space in the U.S.A.
- 5 facilities with SQF food safety certification: Franklin, IN, Hamilton, OH, Murfreesboro, TN, Joliet, IL, Denver, CO
- Customized distribution solutions
- Red Prairie WMS
- Blast Freezing capabilities
- Retail and Foodservice consolidation programs
- Comprehensive management development & training program
- Multiple facility sites "pad ready" for expansion
- Expanding and growing, actively exploring other cities for new locations

QFR Zone®

IT'S NOT A BLAST FREEZER. IT'S BETTER.

- Significantly Improved airflow lessens freeze time
- Drastically lower your blast freezing related utility costs
- Each QFR Zone® is designed to your freezing application with the flexibility to freeze virtually any palletized products
- Freeze faster at higher suction pressures
- Faster product turns
- Easy access to product when freezing is complete
- Better utilization of floorspace
- Lower capital cost on installation
- All product on a pallet is frozen at the same speed
- Runs on less horsepower
- Continuous freezing capabilities, no more batch cycles
