The Pick of the Litter: Custom-Printed, Flexible Pouches!

We've got your pet food packaging dreams 'in the bag.'

From food and treat packaging for cats and dogs to turtles and guinea pigs, we're proud to support today's leading pet food brands!

Complete Customization

Our wide variety of pouching formats and features allows your pet care packaging to be completely customized. After all, learning 'new tricks' is what we do best!

Excellent Graphics

Our expert team manages all printing in-house using state-of-the-art machinery. Expect high quality graphics with the color consistency your brand relies on!

Stand-Up Pouches

Designed for strength and performance, stand up pouches offer flexible in-store display options and premier shelf presence.

Flat-Bottom Box Pouches

Put your best paw forward and increase your number of facings on the retail shelf with more print area for promoting your product.

3-Side Seal Pouch

You'll enjoy the increased run-speeds with form, fill and seal machines. Customers will enjoy the reclosable feature options!

Pinch Bottom Box Pouches

Perfect for your large bag needs, these bags allow for more brand promotion and a stronger shelf presence!

Get Ready to Say Bow...WOW!

Feature Options: All Pouches

Press-To-Close Zipper, Slider Closure, Hook-To-Hook Closures, Perforation Capabilities, Spouts & Fitments, Die-cut Single Handle, Die-cut Dual Handle, Indirect Venting, and Laser Scoring, Tear Notches & Micro-perforations

The Plastic Packaging Technologies Difference

True Partnership

We're in it for the long haul. We spend our time focusing on what matters most to our customers and we're proud to build customer relationships that are decades-long and counting!

Sustainable Packaging Options

Want to reduce your carbon footprint? Ask about our Thrive™ product line of eco-friendly materials to target eco-conscious consumers and move closer to your brand sustainability and recycling goals.

Fitted to Your Facilities

Our job is to provide solutions that meet your product packaging filling requirements. We consider the unwinding direction, inner core size, coefficient of friction, sealing temperature, packing speed and more. Let our packaging engineers design the right solution for your operation!

Let Us Throw You A Bone!

Talk to our team about purposeful, powerful packaging that protects and promotes your pet food!
