

Multi-Blade Saw

Midwest Metalcraft's Multi-Blade Saw offers a unique solution for operations needing to make several cuts of the same thickness. These types of cuts require the operator to work in close proximity to the cutting blade which can be dangerous and time consuming. The Midwest Metalcraft's Multi-Blade Saw addresses these issues and provides superior accuracy and productivity.

Advantages and Key Features

- **Multiple Cuts Per Pass**
Produces higher yields*
- **Hinged Table Loading Area**
For ease of sanitation and maintenance
- **Dual Wash-down Duty Drive Motors**
MMC to provide benefit details
- **Ease of Operation**
Minimizes operator fatigue

Superior Safety

- **Hand Safety**
Operator's hands do not pass the cutting line
- **Shielding**
Operator shielded from blades during each cut pass
- **Multiple Emergency Stops for Operator Safety**
Make this safer than traditional saws

*Study shows a company processing 40,000 lbs. per day can save over \$94,000 in labor.
