

BRAIN & HEART HEALTH

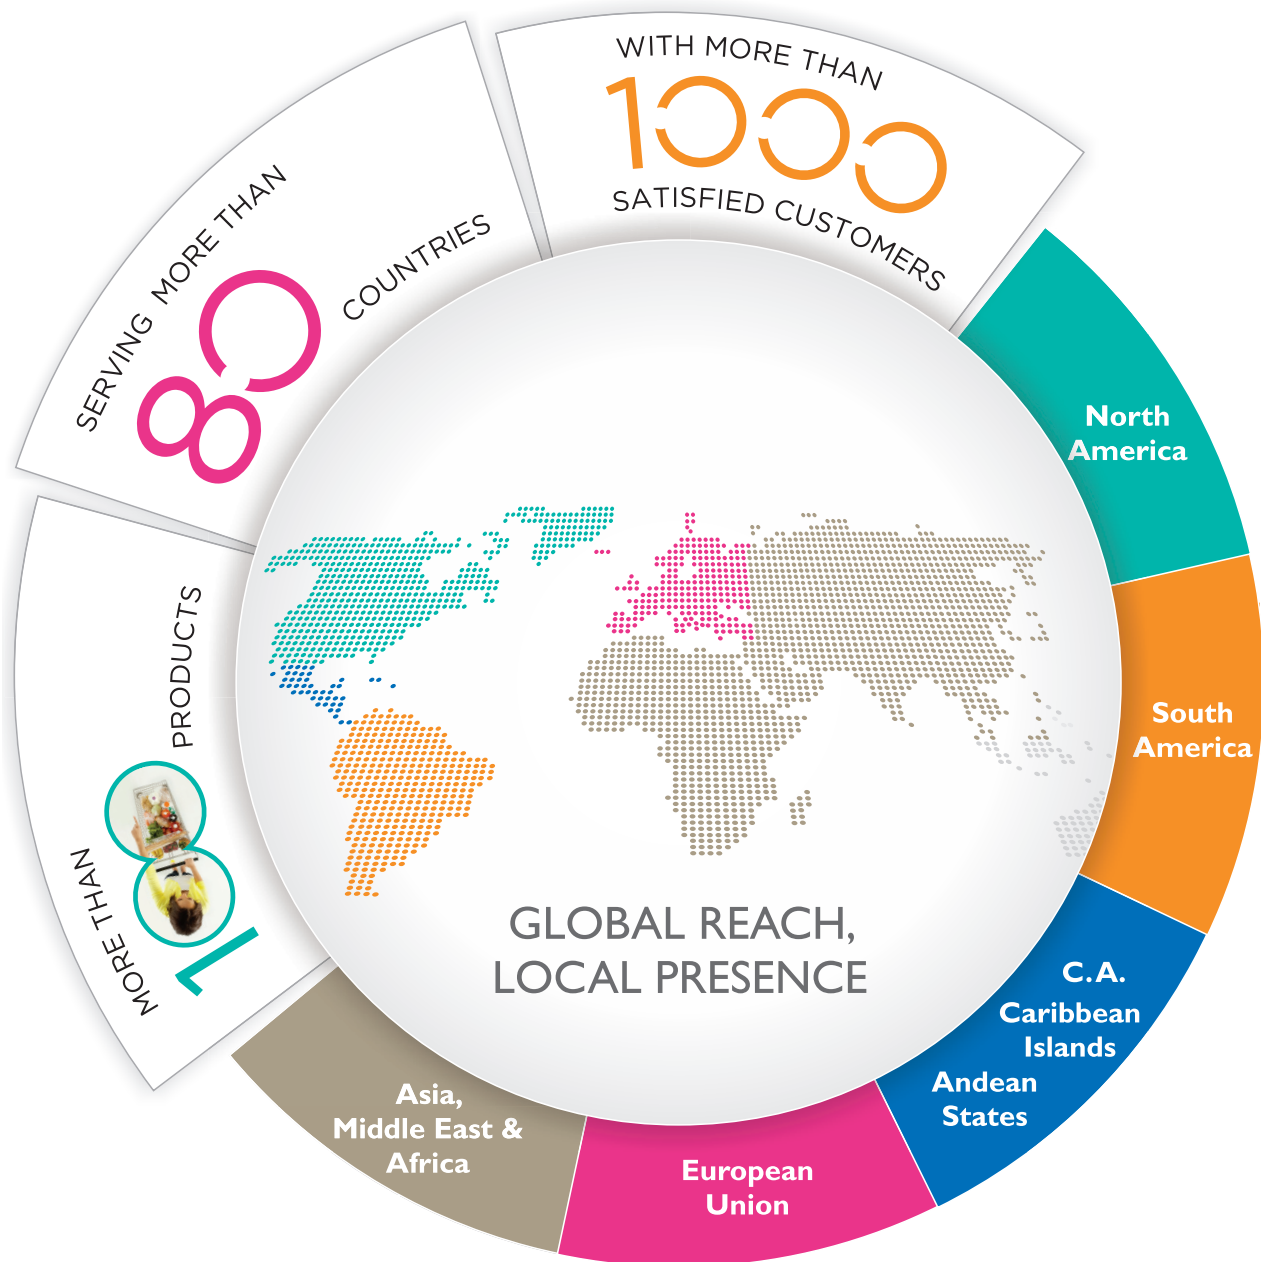

Camlin Fine Sciences has a world class 15,000 liter fermentation facility for our Algal Omega Lipids which is under expansion to 300,000 liters. We take pride in being at the forefront of responsible nutrition, producing environmentally friendly ingredients at ethical prices.

Algal based DHA & EPA contains Omega-3 obtained from a safe and natural source of algae, not fish. These lipids are essential for the functional development of the brain and eye, and may reduce the risk of cardiovascular diseases for your pet.
