

HIP & JOINT HEALTH

It can be difficult to watch our pets grow older and begin to slow down. However, the signs that may be considered as natural slowing down due to old age, may actually be signs that your dog is experiencing joint pain, leading to unwillingness to move around.

Glucosamine HCl

Glucosamine is a natural substance found in a dog's body, with the highest concentration found in healthy cartilage. It produces glycosaminoglycan, which is used to help form and repair body tissues such as cartilage. Research has found that providing supplementation of glucosamine can help rebuild cartilage, which can help restore your dog's joint function and activity levels.

- USP 41 grade Glucosamine HCl standardized to >98%

BosVida™ Boswellic Extract (Boswellia Serrata)

Boswellic extract is obtained from the gum resin found in the bark of the boswellia tree, which is native to India. It can decrease inflammation and inhibits the inflammatory 5-LOX (5-lipoxygenase) enzyme. 5-LOX transforms fatty acid substrates into leukotrienes which are substances that lead to inflammation.

- 65% or 70% total Boswellic Acid

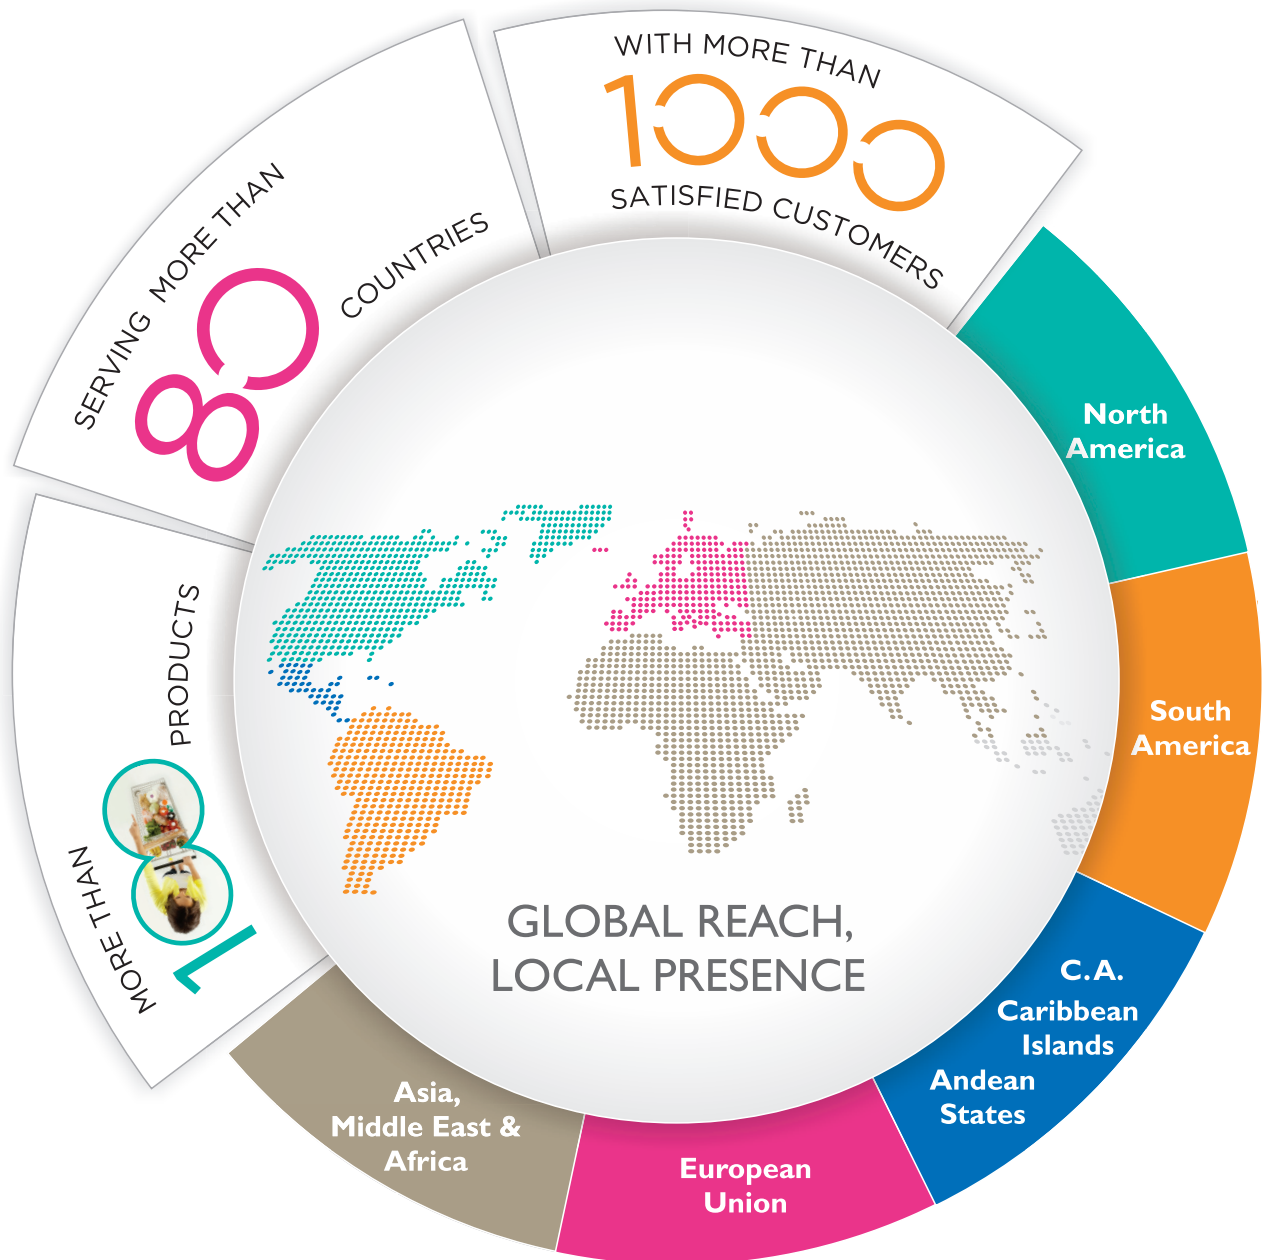

Life Lovers™ Turmeric and Turmeric Extract (Curcumin extract)

Turmeric has been touted as a "Super Herb" and clinical trials over the recent years have shown anti-inflammatory health benefits in dogs and cats.

- Turmeric Powder - 3% to 5 % content (Standard, Organic or Fermented)
- Turmeric Extract - Curcumin 95%
