

PRODUCT RECOVERY PIGGING SYSTEM 

PARTNERS

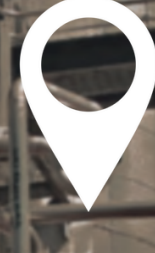

AS A PARTNER, YOU'LL RECEIVE

Application Review

Custom System Design

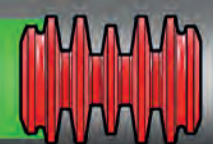

Installation & Commissioning

"Go-To" Source For All Pigging Needs

When it comes to product recovery pigging systems, Pigging Solutions is an experienced partner to many engineering firms and contractors. Whether retrofitting or designing a new plant, Pigging Solutions offers a range of services to facilitate the design, installation, and operation of pigging systems.

OUR SYSTEMS GENERATE

SAVINGS

YOUR CLIENTS CAN'T REFUSE

99%

- + Product Recovery**
- + Safer & Easier Operation**
- + Increased Product Yields**
- + Faster Product Change-overs**
- Reduced Raw Material Consumption**
- Reduced Dedicated Piping**
- Reduced Cross-Contamination Risk**
- Elimination of Flush Waste**

The costs of raw materials, manufacturing and waste disposal are rising. At the same time, customers are placing smaller, more frequent orders and demanding higher product quality. Pigging Systems provide significant cost savings by recovering previously lost product that was trapped in transfer piping and eliminates flush waste and associated disposal expense.

Pigging systems help manufacturing plants become more competitive, attain continuous improvement goals, and become better stewards of the environment. A pigging system's ROI is typically less than 12 months and frequently less than 6 months.
