

EEX SuperCut System

The EEX SuperCut System greatly improves product quality, sanitation, and production rates while lowering expense and frustration compared to legacy cutting systems. The proven results include increased customer satisfaction and profitability for high-quality producers.

EEX SuperCut System

- Excellent product shape and cut quality
- Significant reduction of fines and tails
- Much longer run times, fewer shut downs
- Sanitary and sleek system design
- Reduces clumping and product deformation
- Extreme wear life lowers cost per ton

EEX Self-Tensioning Hub Drive

- Sleek and sanitary, center post design
- Provides consistent quality setup
- Easy to set up, maintain, and operate
- Fast assembly with a single bolt
- Precisely loads Cutter pressure

*Cutters with blade counts from 4 to 30!
System installs easily with just one bolt.*

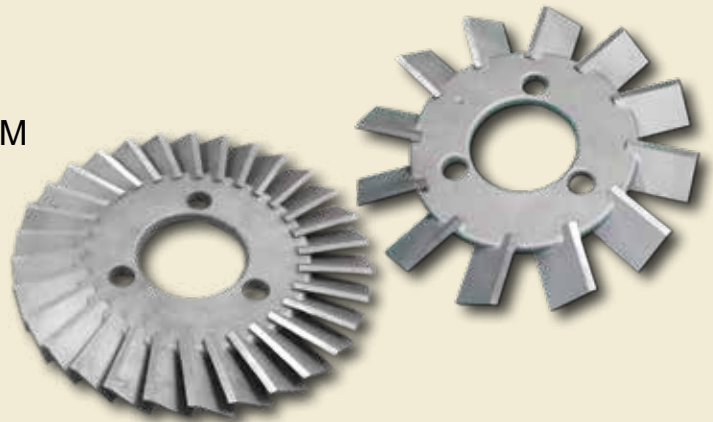

Perfectly flat, the Cutters engage the Die face with slight pressure to sharply cut product, eliminating tails and fines.

EEX Clean-Cut Cutters

- Sanitary one-piece multi-blade design
- Provides great quality cut at reduced RPM
- Higher blade counts available
- Double-sided and reusable
- Extremely sharp and wear-resistant

Competitor Products

Product cut - Not chopped

Quality cut product - No fines or tails

EEX Carbide Dies

- Extended life Carbide Die Plate
- Provides excellent product shape quality
- Critical Die cavity size is maintained
- Downstream wash reduced
- Carbide provides extreme wear resistance
- Die face remains flat and true

EEX SuperCut Extruder Room Benefits

- Operator-friendly design is easy to set up and maintain
- Higher Cutter blade counts for speed control
- Reduction in Cutter RPM is achieved
- Automatically sets uniform cut pressure to die face
- Assemble Die/Cutter/Hub in minutes
- Extremely long wear life of Cutters and Dies
- Cutters and Dies are easily re-sharpened
- Reduces power consumption
- Requires less product capture air velocity
- Drop-in replacement for legacy cutter systems

Ever Extruder is transforming the extruder industry with high-production single screw extruder systems developed through engineering innovation, advanced wear technology, and superior production quality.

The EEX SuperCut System is a powerful example of Ever Extruder's innovation and simplicity in design and function. Highly successful in extruder rooms around the world, the EEX SuperCut System is available for an immediate improvement to your operation.

Learn more about our advanced equipment and engineering by contacting EEX today.

Ever Extruder Benefits:

Consistent machine performance

Less maintenance and rebuilding

Longer run times at peak production

Optimal extruder performance

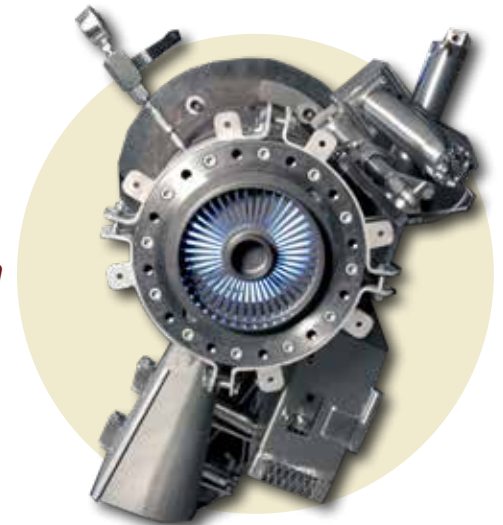

Reduced power consumption

Superior sanitation control

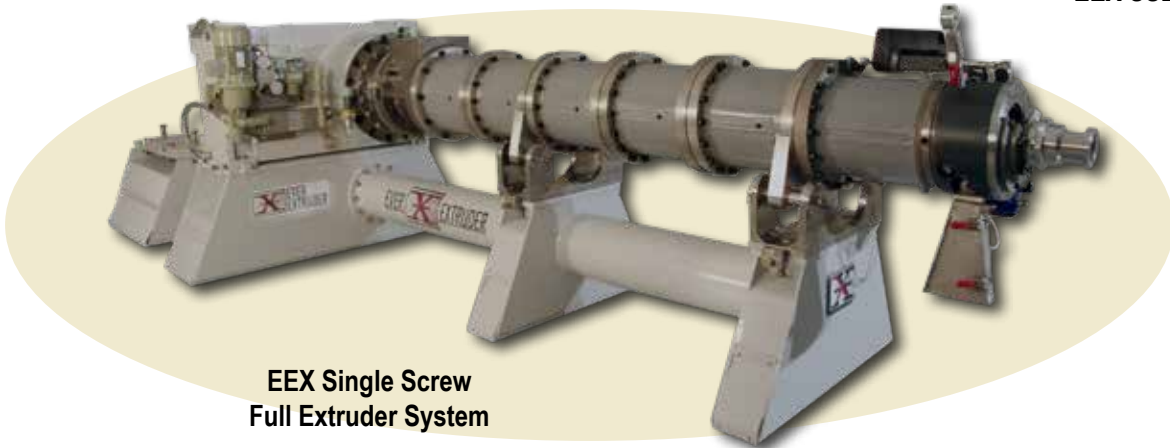

Operator-friendly designs

EEX SuperCut System

EEX SSDS

EEX Single Screw Full Extruder System

Ever Extruder engineers and manufactures extruder equipment, specializing in high-performance aftermarket upgrades and complete single screw extruder systems. With more than 20 years of experience, our engineers utilize state-of-the-art technology to improve extruder room operations, production, profitability, and sanitation in the pet food and aqua feed industries.
