

# THE NEWEST BREAKTHROUGH IN NATURAL SHELF-LIFE STABILITY

## INNOVATION LEADERSHIP

The VERDILOX line of products is a revolutionary natural antioxidant innovation. These **unique** antioxidant combinations provide the ability for petfood manufacturers and ingredient suppliers to stabilize a wide range of petfood products and ingredients. Kemin scientists have spent countless hours harnessing Nature's potential to develop sustainable antioxidants that provide industry leading antioxidant performance. To keep up with the changing dynamics in the petfood industry Kemin has invested its resources into Research and Development, so that we are able to answer current and future challenges for maintaining freshness through management of oxidation. In today's business climate it is easy to offer imitation products, but real partnerships rely on development of innovative solutions that meet your changing needs.

## NATURAL ANTIOXIDANTS SUSTAINABILITY

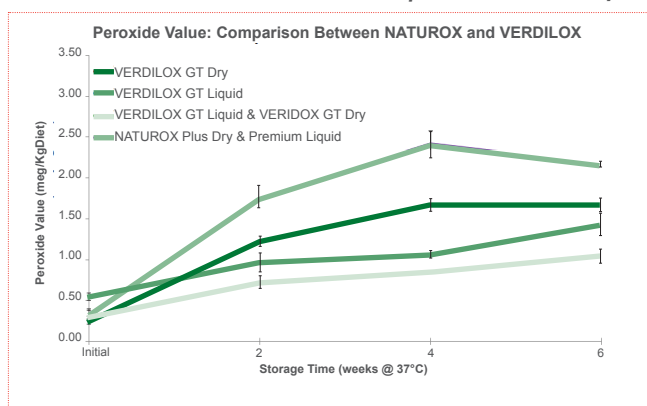

The demand for natural consumer products has continued to experience significant growth across many market segments and regions. "Natural" has continued to be one of the top marketing claims for new petfood product introductions. This broad growth in natural antioxidants usage has created opportunities for innovation beyond mixed-tocopherols. Our integrated ingredient approach has led to the development of VERDILOX. Combining our plant selection and crop improvement competencies with our existing application research expertise has led to these novel products that improve the sustainability of natural antioxidants.

## FEATURES

- Unique blend of botanical sourced antioxidants
- Improved chelation
- Vertical integration
- Improved sustainability
- Enhanced performance

Change is a way of life at Kemin. We recognize that changes in your business require us to adapt to meet your needs and expectations. When your next challenge arises trust that Kemin will be there with our innovation, technical expertise, and product support to meet that challenge.
