

PREMIUM DEODORIZED FISHOIL

AntarcticOmega is pleased to announce to the *Petfood Forum* community that the most modern technology of low-temperature vacuum deodorizing and physical refining fishoil intended for Premium petfood ingredients has completed the final construction steps and achieved HACCP status. The start-up process has followed multiple plant audits to comply with international veterinary standards for safe animal ingredient inclusion. The new processing plant was commissioned by Industrial Maule Ltda. to DeSmet Ballestro, a leading refinery builder from Belgium. The plant is located in Coronel, Chile at the hearth of a salmon, anchovy, and sardine fishery complex where one of the world's richest marine environments is found. The pristine waters of the South Pacific Seas provide our products with the highest content of natural Omega-3, an essential polyunsaturated fatty acid with proven health benefits into pet nutrition.

AntarcticOmega offers a full range of **PREMIUM DEODORIZED FISHOIL** to enhance petfood's premium nutritional formulations with 100% sustainable and traceable fish sources. The benefits of a gentle low-temperature vacuum deodorization include protecting the integrity of valuable EPA and DHA, neutralizing the fishy aroma, and maintaining the palatability of a premium marine ingredient in the final petfood. AntarcticOmega **PREMIUM DEODORIZED FISHOIL** is offered in 3 exclusive formulations for petfood: **SALMON FISHOIL**, **SARDINE FISHOIL**, and **ANCHOVY FISHOIL**. Imported from Chile and distributed from our FDA-licensed food facility in Port Arthur, Texas.
