

Antioxidants for petfood

Vitablend is a leading provider of antioxidant systems for pet food products. We offer a dedicated range of both natural and traditional phenolic based antioxidants combined with full analytical support to protect your pet food products from the effects of oxidation.

Natural antioxidant solutions

Toco-PET range

The Toco-PET range consists of natural formulated mixed tocopherols, with or without synergistic rosemary extracts designed for superior natural protection against the oxidation of feed and pet foods.

Toco-PET blends are all available as Identity Preserved (IP) and non-GM.

Toco-PET Pd30 x-IP	Dry powder natural tocopherol
Toco-PET IP	Liquid tocopherols suitable for use in spray systems
Toco-PET IPR	Liquid tocopherols with added rosemary extract suitable for spray systems
Toco-PET TR10L	Tocopherols and rosemary in liquid suitable for spray systems

Phyt-OX range

A new, clean label system, providing cost-efficacy close to traditional synthetic antioxidants. Available in dry and liquid formats.

Phyt-OX Liquid and Dry	Natural phenolics
------------------------	-------------------

Rosal-PET range

A comprehensive range of rosemary extract systems offered in dry and liquid formats. Vitablend rosemary extracts offer refined, low odour and low colour cost-effective natural means to stabilise petfoods against oxidation.

Rosal-PET 3 LRD	Liquid rosemary extract minimum 3% carnosic acid suitable for use in spray systems
Rosal-PET 5 LRD	Liquid rosemary extract minimum 5% carnosic acid suitable for use in spray systems
Rosal-PET 10 dry	Powder rosemary extract with a total carnosic acid and carnosol min 10%

Synthetic antioxidant solutions

Vital-OX & Vita-PET range

A very comprehensive range of widely used and tested traditional synthetic antioxidants, based on BHA, BHT, propyl gallate and citric acid, for superior protection against oxidation in pet foods. Available in dry and liquid formats.

Pet Safe	A range of BHA and BHT free cost-effective antioxidants
Vital-OX 10	BHA and BHT in equivalent ratio available as liquid and dry powder
Vital-OX 20	Optimised ratio of BHA and BHT liquid for cost effective use in liquid or powder
Vital-OX 5	BHA Liquid
Vital-OX 14	BHT Liquid
Vital-OX 55	Concentrated BHA and BHT in liquid form
Vital-OX BHA 90-FF	Concentrated BHA in powder form ideal for premixes
Vita-PET 24-8-8	BHA, propyl gallate and citric acid in optimised ratio liquid

"Vit-Assurance" meal stability analysis

Vitablend understands that manufacturing pet food products requires more than just ingredients. Our antioxidant ranges are fully supported by a comprehensive internal meal stability and fat analysis, together with pump installation and a pump calibration service, giving our "Vit-Assurance" to the quality of your pet foods.
