

Your recipe.
*Automated
to perfection.*

It's remarkable what goes into your recipe. Engineering, building, creating, revising and setup. Planning and processes. Management and training. It's a scale that's hard to imagine until you've imagined it. Yet, we do it every day. And because we're focused on food, nobody understands it better.

Confidence.
Built in.

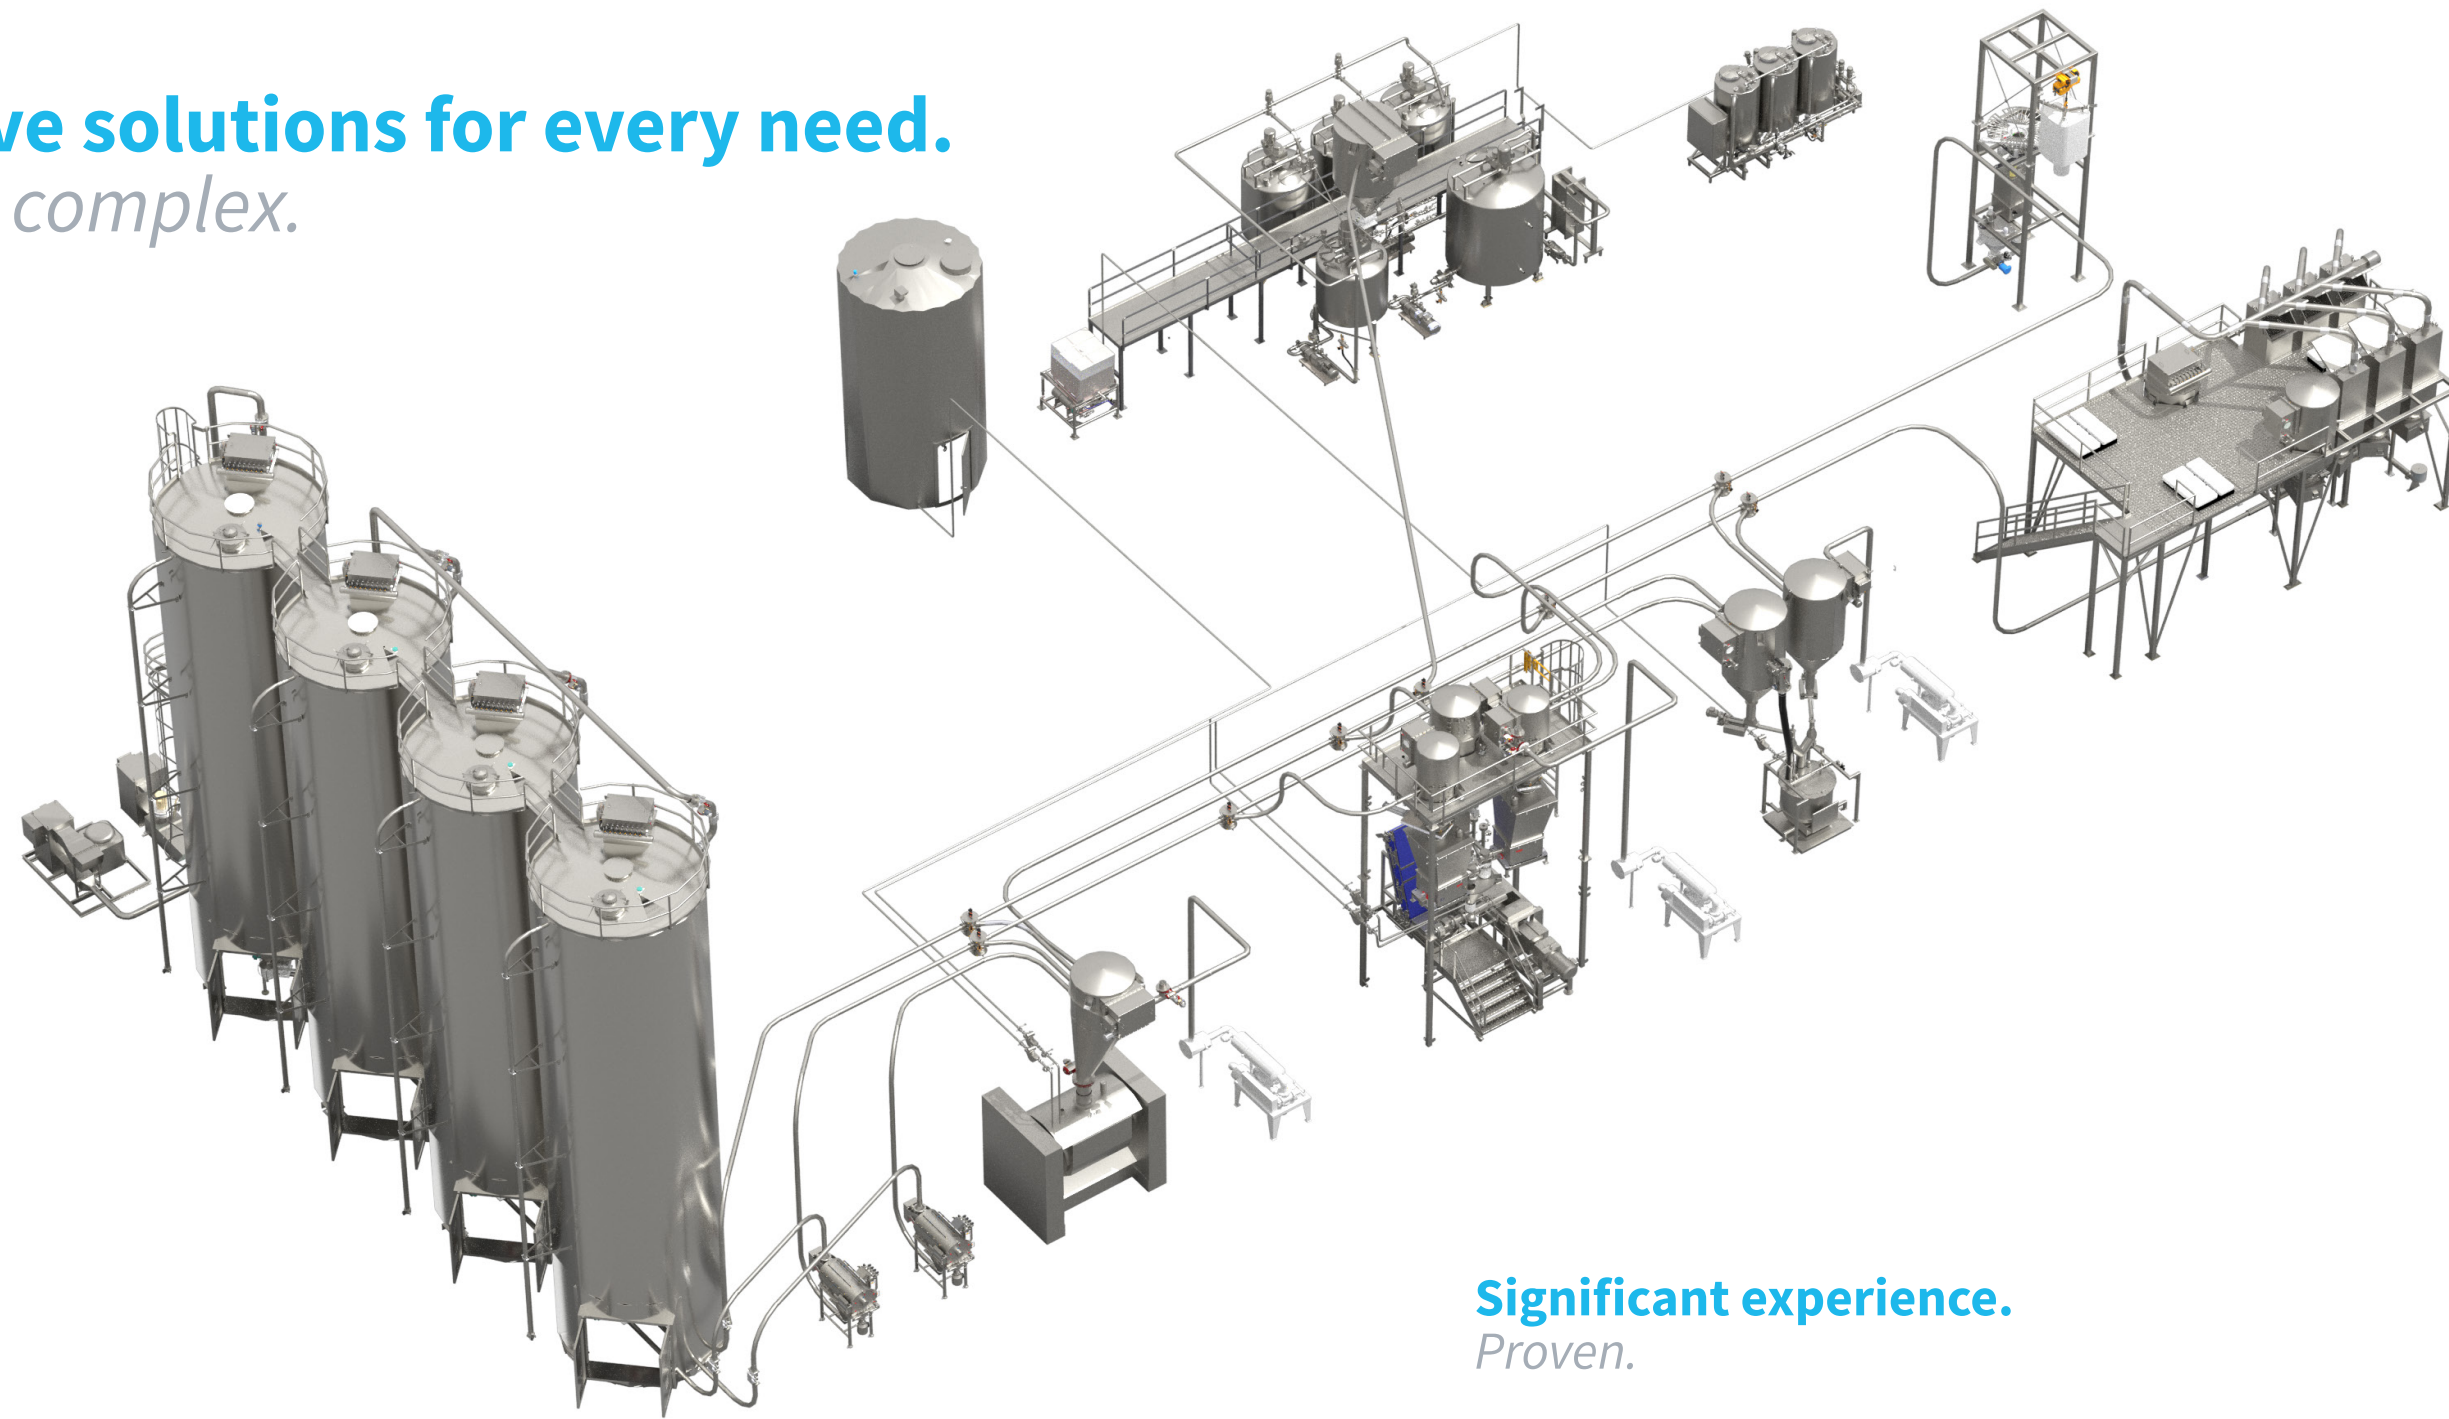

Quality, robust ingredient automation. Reliable, repeatable process management. Unmatched service and exceptional value that create enduring relationships. That's Shick Esteve. The only global provider focused solely on food.

Food-focused for more than 60 years.
Global resources that deliver more.

Innovative solutions for every need.

Simple to complex.

Process.

Start to finish.

From conception to creation, ingredient to final product, our process involves full-system solutions that meet or exceed the highest industry standards. Our reliable, high-value solutions ensure years of successful operations. Designed, manufactured and installed by Shick Esteve.

- High reliability and repeatable results
- Focused on food safety
- Continuous improvement
- Solutions tailored to your needs
- Startup, training and maintenance worldwide
- Compliance with wide variety of regulations and standards
- Modular and pre-cabled equipment to minimize install time
- Easy cleaning and maintenance

Significant experience.

Proven.

Saying you understand the complexities of food ingredient automation is one thing. Proving it is another. Our storied history in the industry speaks for itself.

60+ years in ingredient handling

4,000+ installations worldwide

2,000+ silos delivered to date

ONE GLOBAL SUPPLIER:

- Ingredient storage
- Minor ingredient automation
- Liquid systems
- Controls and automation
- Site services
- After-sales support

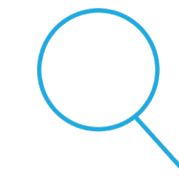

Clarity Software Suite

Shick Esteve has designed integrated, easy, and secure systems for anyone to use. Simply put, we provide the right data so you can make decisions.

Production Management

- Provides full control of production scheduling
- Easily add / edit recipes
- Track ingredient quantities and lot codes

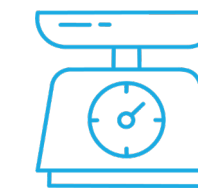

Schedule Viewer

- Keep personnel informed about the production schedule
- Enables a read-only view of batch processing

Data Management

- See real-time and historical data
- Enables quick determination of system inefficiencies
- Promotes preventative/proactive maintenance

Prescale Minor / Micro Ingredients

- Provides for consistent, repeatable dosing of ingredients
- Support for multiple prescale stations
- Provides full lot traceability (barcode scanning / traveler tickets)

Advanced Batch Reporting

- Customizable view into production data
- Supports integrated data-sharing to remote ERP systems

Lot Tracking

- Enables full lot traceability of major ingredients
- Assign lot codes upon receipt of each ingredient
- Full support for lot association to batches
