EXPERTS IN PET FOOD TESTING & INSPECTION

Bureau Veritas' leading network of precision testing facilities provides expert analysis for all of your required testing methodologies. Our experienced scientists provide clear and concise analysis results, operating under international analytical standards and accreditations.

Bureau Veritas' testing & inspection services include:

- Food and agri quality analysis
- Commodity grading under relevant standards (USDA, CGC, etc)
- Chemical residue, mycotoxin & GMO analysis
- Microbiology testing
- Analytical testing
- Nutritional testing
- Draft survey and tank gauging | holds & tank inspection
- Contractual sampling & sealing
- Seal breaking, damage surveys, loading & discharge inspections/supervision
- Traceability inspections
- Quality and analysis of subplot and hold samples; determining accurate assessment of goods immediately after shipment

WHAT DOES BUREAU VERITAS PROVIDE TO HELP YOU OBTAIN BETTER RESULTS?

- An online customer portal for electronic chain of custodies, obtaining test results and trending data
- Rapid testing methods to decrease turnaround time and improve hold and release practices
- An extensive global network of offices and laboratories
- Consistent inspection testing methods and techniques
- A clear focus on sampling and analysis as per incremental subplot quality control
- Fast and efficient reporting of results and certification issuance
- Daily reporting including operational photographs during order execution that are accepted by the international banking and the trade finance industry

Trusted by 6 of the 8 leading pet food manufacturers in North America!
