

Treat your companions to safer, fresher, tastier and cleaner label products

Our Solutions

- Enhance yield
- Improve palatability
- Extend shelf-life (primary and secondary) and provide safety
- Clean label and natural alternative to chemical preservatives
- Improve quality upstream

PET FOOD PALATABILITY

Consumption Ratio:
4.07 to 1

20 dogs over two days consumed more food with Wolf than Potassium Sorbate.

First Choice Ratio:
39 to 1

Food with Wolf was chosen first on 39 occasions. Potassium Sorbate was chosen first only once.

Inclusion levels: Wolf (dry) at 1.0% and Potassium Sorbate at 0.5%

Product type details: Semi-moist (8x8 mm), 19.41% moisture and 5.53 pH in Wolf and 18.31% moisture and 5.51 pH in Potassium Sorbate.

Both diets represented an industry typical grain free, high protein, soft-moist nugget.

Our Products are:

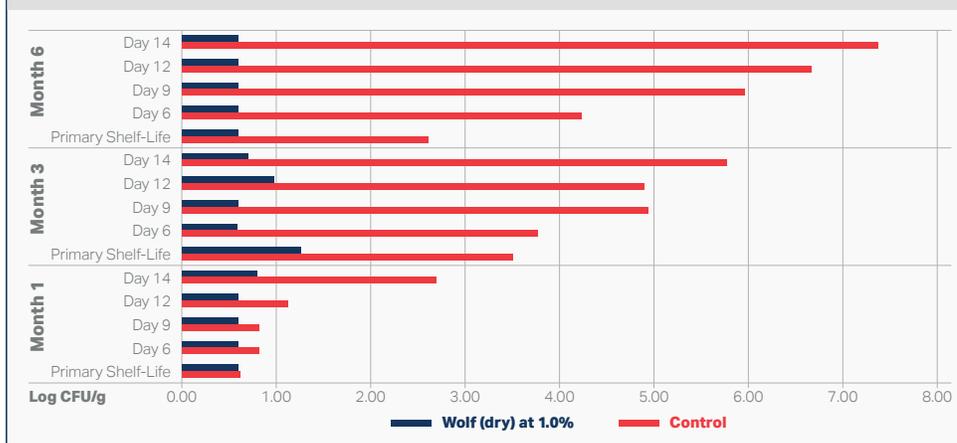

- Naturally-derived
- AAFCO "common and usual"
- GRAS ingredients
- Clean label
- Non-GMO
- Liquid or dry

Applications

- Kibble, including dry-expanded, semi-moist and soft-moist
- Refrigerated fresh

PRIMARY AND SECONDARY SHELF-LIFE

Yeast and Mold in Refrigerated Chicken Pet Treats

WTI has been leading the functional food ingredient industry for over 30 years, producing naturally-derived, patented and performance-validated food ingredients that are simple, clean and safe.

Our naturally-derived vinegar antimicrobials and lemon-based phosphate alternatives are known for their performance, quality and consistency.

We are now offering ingredients to enhance your pet food products that meet the same high standards that you have come to expect from WTI.

Simple. Clean. Safe.
