

PETFOOD

From concept to commissioning, Weitz has the resources to design and implement all facets of your petfood manufacturing plant. Our knowledge of dry extrusion production and wet petfood processes combined with our complete self-performed, design/build abilities, means you can work with a single source design/build contractor to: conceptualize, design, build and maintain your facility.

PROJECT EXECUTION STRATEGIES

- Design-build general contractor
- Construction manager
- Specialty contractor

INDUSTRY KNOWLEDGE

- Dry extrusion
- Wet petfood
- Biscuits/treats

INTEGRATED SOLUTIONS

- Food safety and sanitary designs
- Greenfield, expansion and renovation work
- Self-perform capability
- In-house engineering and technical staff
- Slipform concrete and steel structure designs
- Mass flow hoppers
- Technical and process engineering
 - + Site audits
 - + Evaluations
 - + Master planning for improving efficiencies of existing/new process lines

TESTIMONIAL

We, at TFP Nutrition, Inc., began our partnership with Weitz in January 2019. Weitz led their introduction to us with engineered based solutions. They resolved our growth requirements by strategically identifying plant upgrades while performing a plant-wide audit, then provided engineered solutions and lastly the construction was carried out with highly skilled Weitz's, self-performing, crews. We plan to continue our partnership with Weitz for future projects – because they are problem solvers.
