

SMARTKARTON

The EZ paper handle is simple for delivery drivers and consumers to lift and carry. Boxes up to 60lbs in weight can be filled, allowing for many different heavy bulk products to be shipped with ease.

The pack has also been designed with retail sales in mind. Full high color graphics are available while the pack also lends itself too much better shelf appeal compared to connectional bags.

When delivered to the consumers home, the Ship Ready Bulk Box® opens to serve as a dispenser box with no need to handle the bag or transfer it to a storage container in the home.

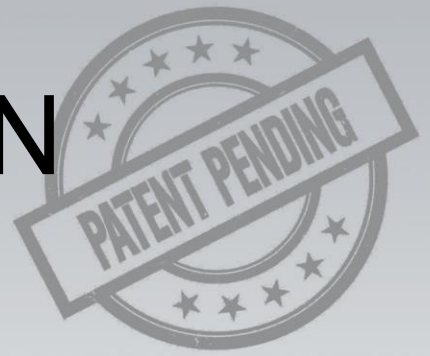

Ship Ready Bulk Box is patent pending by Smart Karton LLC

SMARTKARTON SHIP READY BULK BOX

“Bagged Bulk” products now in a ship ready container.

- Eliminates additional packaging to ship
- Reduces labor to ship/no repacking
- 100% manufactured from paper
- Retractable paper handle
- Tear strip for easy opening

The New patent pending Ship Ready Bulk Box is manufactured from a strong corrugated outer that can be printed as required.

There is a protective internal coated liner that is Entomology tested & laminated to the outer, making it a one-piece pack. The pack is flat packed on pallets and delivered to the filling facility.

It can be manually or automatically erected and filled with product using the same fill method as currently employed. The pack is then sealed shut, palletized, and shipped to the fulfillment facility.

Now simply apply the address label and ship the product!!!

SAVE LABOR — SAVE PACKAGING - SAVE COSTS
