

DUST COLLECTORS

IMPROVE PLANT CLEANLINESS & INCREASE EFFICIENCY

01 Greater dust control

Self-contained system improves safety and housekeeping.

02 Minimize maintenance

The automatic, alternating, reverse pulse-jet filter cleans the filter to ensure proper dust collection with minimal maintenance requirements.

03 Integrate as part of a system

The Dust Collector can be integrated with a hopper and is easily combined with conveyors, mixers, and other material handling and processing equipment.

Hapman Dust Collection Come Standard with:

- Front access door for tool-less filter removal (Side access door on SR Series)
- Removable air baffle on SR Series
- Gas spring assisted hinged door
- Reverse pulse for filter cleaning with adjustable timer (10 SCFM @ 50 psi (min) compressed air supply)
- Filters rated at MERV 16 (99.1% minimal efficiency at .3-1 micron)

SR Series can be integrated with a hopper and is easily combined with conveyors, mixers, and other material handling and processing equipment.

FR Model is designed for non-washdown applications that require additional filter area or frequent filter changeovers.

FL Model is designed for washdown applications that require additional filter area or frequent filter changeovers.

GB Model is designed for non-washdown applications that require an additional layer of protection for your operators.

Optional

Keep areas surrounding your operation clear of debris and dust with a bag compactor. Hapman compactors attach to the side of your bag dump station through an access port in the station's side wall. Empty bags pass easily into the compactor, so dust does not have an opportunity to leave the station.

Ask about our free material testing!

Hapman offers a complete line of material handling equipment that easily integrates into existing systems, including:

- Flexible Screw Conveyors
- Tubular Drag Conveyors
- Vacuum Conveyors
- Feeders
- Bulk Bag Unloaders
- Bulk Bag Fillers
- Bag Dump Stations
- Lump Breakers
- And More
