

Oterra™

*Appealing*  
**pet food**

Draw on our expertise to meet consumer demand for appetizing, natural pet food

**Recommended for:** dry extruded kibbles, baked and semi-moist treats, wet and gravies

US edition

# Appealing pet food

Draw on our expertise to meet consumer demand for appetizing, natural pet food

We use our color knowledge to develop cost effective products with the characteristics you're looking for.

Our minimally processed coloring ingredients include an industry first

Our award winning, proprietary Hansen sweet potato™ is the first vegetable specifically developed for its unique coloring properties.

It delivers a unique, meaty shade to pet food applications, such as kibbles, baked products or semi-moist treats.

Our stabilizing technologies improve color functionality of turmeric

Our stabilizing technologies are designed to protect the pigment and ensure they are resilient and stable in the end product.

### Accelerated light test

## Product overview

Shade	Source
Yellow	Turmeric
Orange	Annatto, orange carrot, paprika
Red	Cochineal
	Hansen sweet potato™, red radish
