MASS BALANCE APPROACH

Our Circular Pouch is designed to help pet brands achieve complete circularity by using Advanced Recycled and Post-Consumer Recycled content, which redirects waste plastic that would have been sent to landfill. This radical combination uses recycled materials, and its recycle-ready nature allows for the material to be used and collected for re-use, closing the loop. This leading-edge solution not only offers the same quality appearance and performance as virgin plastics, but helps to satisfy potential upcoming sustainability policy changes.
